

We are glad to send you the first announcement for the [19th European Workshop on Heterostructure Technology](#) which will be held in Fodele, Crete, Greece from October 18th to 20th, 2010.

The 19th HETECH Workshop is intended to bring together young scientists, engineers and post graduate students along with experienced researchers and industry representatives, working in the field of compound semiconductors and other heterogeneous technologies focusing on materials and devices for electronics, optoelectronics and sensing.

We invite the submission of abstracts for presentation in the following areas:

- III-V, SiC, II-VI, diamond, graphene, CNTs and organic semiconductors
- Substrates and epitaxial growth
- Material characterization
- Physics of heterostructures and nanostructures
- Novel nanoelectronic and nanophotonic materials and devices
- Semiconductor-based sensors and MEMS, biochemical sensing
- High frequency electronic devices
- High power electronic devices and light emitting diodes

Details on submission, registration, program and venue will be available on the conference website:

<http://www.mitos.com.gr/conferences/hetech2010/index.html>

Please pay attention to the following important deadlines:

July 18, 2010 Short abstract submission

Aug. 30, 2010 Hotel reservation and Conference registration

Sept. 24, 2010 Submission of extended 2-page abstract

The Organizing Committee
